Personal portfolio using
HTML, CSS and JavaScript

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

Many students and beginners in web development struggle to showcase their skills, projects, and achievements in a professional and accessible way. Traditional resumes often fail to highlight practical abilities and creativity. To solve this, there is a need for a personal digital portfolio website that allows individuals to present their work, skills, and projects in an interactive, visually appealing, and user-friendly format.

PROJECT OVERVIEW

This project is a personal digital portfolio website created using HTML, CSS, and JavaScript. It is designed to showcase my skills, projects, and passion for web development in a professional way. The portfolio includes sections like Home, About Me, Projects, and Contact, making it easy for visitors to know more about me, explore my work, and connect with me. The website is responsive, ensuring a smooth user experience on both desktop and mobile devices.

WHO ARE THE END USERS?

The end users of this portfolio website are teachers, recruiters, classmates, and anyone who wants to know about my skills, projects, and work. It helps them easily see my abilities and contact me.

TOOLS AND TECHNIQUES

- HTML → to create the structure of the website.
- CSS → to style the pages and make them look attractive.
- JavaScript → to add interactivity and make the site dynamic.
- Responsive Design → to make sure it works on both computer and mobile.
- Code Editor (like VS Code / Sublime Text) → for writing and editing the code.

POTFOLIO DESIGN AND LAYOUT

The portfolio has a clean and simple design with easy navigation. It includes sections like Home, About Me, Projects, and Contact. The layout is responsive, so it adjusts to both computer and mobile screens. Colors, fonts, and spacing are used to make the website look professional and user-friendly.

FEATURES AND FUNCTIONALITY

- Home Section – gives an introduction and welcome message.
- About Me Section – shows personal details, skills, and background.
- Projects Section – displays the projects with descriptions.
- Contact Section – allows users to get in touch easily.
- Responsive Design – works well on both computer and mobile.
- Interactive Elements – JavaScript adds animations and smooth navigation.

RESULTS AND SCREENSHOTS

The result of this project is a personal portfolio website that is user-friendly, responsive, and visually attractive. It successfully showcases my skills, projects, and contact details in one place. Visitors can easily navigate through the sections and learn more about me.

CONCLUSION

This project helped me create a personal digital portfolio website using HTML, CSS, and JavaScript. It provides a professional way to present my skills, projects, and achievements. The website is responsive, easy to navigate, and useful for teachers, recruiters, and others who want to know about me.
